### **About Dataset**

The joy scores and rankings utilize information from the Gallup World Survey

This file contains the Happiness Score for 153 countries along with the factors used to explain the score.

The Happiness Score is a national average of the responses to the main life evaluation question asked in the Gallup World Poll (GWP), which uses the Cantril Ladder.

The Happiness Score is explained by the following factors:

- GDP per capita
- Healthy Life Expectancy
- Social support
- Freedom to make life choices
- Generosity
- Corruption Perception
- Residual error
