

CO2 emission from electricity consumed in Denmark

Link to data and documentation: <https://www.energidataservice.dk/tso-electricity/CO2Emis>

About Dataset

The dataset is an updated near up-to-date history for the CO2 emission from electricity consumed in Denmark measured in g/KWh. The resolution of the data is 5 minutes but the up-date frequency is a bit slower, which is 15 minutes.

5 minutes UTC	5 minutes DK	Price area	CO2 emission
